

Hello, Developers!

DiPS CodeJam 22

Prompt

Given a random string n of length ≥ 100 characters, print a formatted string `Hello, <n>!`. The first (and the only) input line contains n – which you have to format.

Sample Program

```
1 name = input() # Take the given input and store it in a variable
2 print(f'Hello, {name}!') # Print the formatted line
```
